RE: West Lake Landfill - EPA Docket VII-93-F-0005

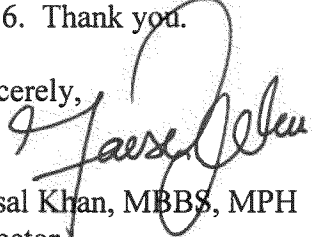

Dear Ms. Stoy:

The St. Louis County Department of Health – Solid Waste Management Program (HD-SWMP) has recently reviewed your April 20, 2015 correspondence to the West Lake Landfill PRPs, which were obtained from the EPA's West Lake Landfill web site. Your correspondence referred to two previous documents dated October 31, 2014 and February 13, 2015 that were associated with current efforts to evaluate the partial excavation of RIM alternative for OU-1 Areas 1 and 2. These two previous documents were not included in the EPA's West Lake Landfill web site, but have since been obtained from the Missouri Department of Natural Resources (MDNR) who were copied on your April 20, 2015 correspondence.

The MDNR and the HD-SWMP share regulatory authority and oversight over the Bridgeton Landfill and the other OU-2 areas adjacent to the OU-1 areas. As such, activities associated with OU-1 have a direct effect on OU-2. Therefore, we are requesting or seek your assistance to include the HD-SWMP in future CC lists between the EPA and the PRPs regarding OU-1 activities.

We appreciate the EPA's efforts in their endeavor to address the West Lake Landfill issues within our County. If you have questions or desire additional information, please call Laura Yates, HD-SWMP Field Services Supervisor, at 314-615-4035 or Mark Milward, HD-SWMP Project Engineer, at 314-615-4116. Thank you.

Sincerely,

Faisal Khan, MBBS, MPH
Director
